VOL. XXXI. No. 30.

DIDSBURY, ALBERTA, THURSDAY, JULY 26, 1934

\$2.00 per year. 5 cents a copy.

Corner-Stone of New Church Laid

The corner-stone of the new Evangelical Church was laid Sunday afternoon by Rev. W. W. Krueger, Ph. B., superintendent of missions of the Northwest Conference. A large attendance was present to hear Rev. Krueger and see the copper box containing books, money and papers laid away in the corner pillar and sealed in by a marble slab bearing the name of the church and date of the building.

The box contained all the old records taken from the old corner stone after the fire; a copy of the latest discipline of the church, a catechism, hymn book, the church papers, Sunday school literature, the current issue of the Didsbury Pioneer and a number of current coins.

The service was held on the building site and was conducted by Rev. H. J. Wood, pastor of the church. Following devotional exercises and an anthem by the choir, Rev. Krueger addressed the gathering and deposited the box, closing the opening with the marble slab.

Unemployment Conference

Alberta government will be represented by Hon. Geo. Howley, minister of health and telephones, at the unemployment conference at Ottawa at the end of July. Accompanying him will be J. C. Thompson, provincial auditor.

Didsbury Lose To Hainstock

Hainstock Play Here Tonight.

Fanning 13 batters, walking two and allowing a scant three hits, young Cole pitching for Hainstock had the Didsbury ball players talking to themselves at Hainstock Tuesday night in the first game of a series to decide who will meet Bowden for the championship of the Rossbud League. Without the services of Charlie Geiger at third base and George Geiger, star pitcher, Didsbury presented a weak team that just didn't seem to get its bearings until it was much too late.

Ray Stouffer started on the mound for the locals and twirled a steady game until the fourth frame when he was replaced by George Hardy. Hainstock scored five runs in that session to make a total of six. They got one more in the seventh and three in the eighth for a total of ten while Didsbury scored their only run of the game in the ninth inning on a triple by Woodlock who scored on Gooder's single.

The second game is scheduled for Thursday (tonight) at Didsbury when, with a full team, the home crew are confident of taking a win and forcing a third game to settle the issue.

Hainstock: D. Ross 3b; Bolton H.; Jackson 2b; Cole p; Patmore C.; Miller; Allen cf; C. Ross cf; Herbert 1b.

Didsbury: Bercht 2b; Leavens cf; Wyman 1b; Woodlock 3b; Gooder ss; Hardy 3b; Stouffer C.; Halub cf; Halton 1b.

Sale of Rural Lines to Farmers

It has been known for some time that the Alberta Government has been losing money on its rural telephone lines.

In consideration of this fact the Department has decided that it cannot continue to maintain these lines. It, therefore, the farmers of this community wish to have telephone service it will be necessary for them to purchase and operate their own system.

On account of the extremely low prices at which the Department is selling their equipment the farmers would be able to operate their lines for a little more than half what it has cost the government.

The approximate cost of buying the equipment in the Didsbury district would not exceed \$25.00 per subscriber.

We would suggest that the farmers get together to discuss this matter, with a view to organizing their telephone company in this community.

For further particulars those interested should see Mr. Bowman, manager of the local telephone office.

School Board Meeting.

Repairs and improvements were the main topics considered by the school board at a special meeting last Monday night. Committees were appointed to investigate cost of flooring one room, repairing cement walks in the school yard and the refinishing of window ledges in the public school. The committees will report next Monday night at the regular meeting of the board.

Resignation of Miss A. Black was accepted with regret and the secretary was instructed to write Miss Black accordingly. The board has 21 applications on hand for the vacancy caused by Miss Black's resignation but decided to wait until the next meeting to take any action in filling the position.

More Trout Fry Placed in Bear Creek.

Five thousand Loch Leven trout fry were placed in Bear Creek about a half-mile north of the Percy Fair home early Tuesday morning. Clint Reiter and Tom Johnson took the fry off the midnight train and immediately made the trip out to the creek. The fry came from the hatcheries at Banff.

Six Passengers In Car Fall 25 Feet, Unhurt

Dame good fortune beamed on Mrs. W. E. Strangways and a party from Claraholm when their car, driven by Miss Ethel Strangways, jumped a bridge one mile south of town and took a 25 foot drop without injury to the car or the six occupants including an 84-year old lady.

Traveling north, the Strangways car started down the Hunsperger dip when they noticed another car coming down the other side. Applying the brakes caused their trailer to swing over into the oncoming car, the impact throwing their own car into the railing and over the bridge.

The car occupied by Ed Lindberg and P. H. Simonson of Kingman, Alberta, received the most damage, one wheel being smashed and another was damaged, but neither lad was injured. The Strangways car was enroute to Lacombe.

Mrs. Alice Cook, 84 years of age, was one of the coolest members of the party during their exciting accident.

Silver Wedding.

Congratulations are being extended to Mr. and Mrs. Hugh McLean, who quietly celebrated their silver wedding anniversary on July 21st.

Hugh McLean of Didsbury was married July 21st, 1909 to Katherine Cameron, only daughter of Mrs. Christina Cameron, the ceremony taking place at Shad Lake. The couple took up residence on Mr. McLean's farm east of Didsbury and have remained there since.

Three daughters were born of the union. The eldest, Miss Tenn McLean, is on the staff of the mental hospital at Ponoka; Sadie is at home, and Gertrude attends the Didsbury High School.

Friends and neighbors unite in wishing Mr. and Mrs. McLean many more happy years.

Oddfellows Entertain.

About 100 visitors were entertained Thursday night by Didsbury Oddfellows Lodge when the third degree was conferred by Crescent Lodge degree team of Calgary. The Grand Master, O. S. Martin of Hardisty was present. Other noted visitors were, Bro. Murray Saunders, Deputy Grand Master and Bro. D. F. Christie Past Grand Master.

The Travelling Gavel was presented to this Lodge by members of Bowden lodge and will be retained by Didsbury for a month before being passed on to another lodge in the district.

Will Hold Dance To Aid Hospital

The Mountain View Women's Institute will hold a dance next Wednesday evening in the Community Hall in aid of the Didsbury Hospital.

Allison Mack's orchestra will be in attendance and a good turn out is expected, as this cause is worthy of your best support.

Admission: Gentlemen 50c and ladies free.

To Visit Kentucky

Mr. and Mrs. W. J. Fulkerth and son Rex, with Mr. and Mrs. Walter Fulkerth and son Bobbie and Mrs. L. B. Fulkerth left last Thursday morning on an extended visit to Louisville, Kentucky.

Mr. W. J. Fulkerth intends attending some of the Kentucky horse shows and will probably return with a first class saddle horse. He expects to attend the Illinois and Missouri State fairs.

Mr. Fulkerth is introducing a new blood stock to his already famous stable of Kentucky horses with which he has won many prizes throughout the province.

Coming Events.

Melvin Go-Getters' Sports Day and Picnic—Wednesday, August 1st at Dog Pound Flats. Big Softball Tournament, 1st prize \$10.00, and 2nd \$5.00. All prizes for foot races, etc. Entries for the softball tournament must reach Geo. Youngs or Mrs. August Krebs, Melvin, not later than noon August 1st. Admission: Adults 25c, schoolchildren free.

Field Days, Lacombe Experimental Station

The following interesting field days have been arranged at the Dominion Experimental Station at Lacombe, according to F. H. Reed, superintendent:

- July 31, Alta Clydesdale Breeders
- Aug. 1, Alberta Boards of Trade
- Aug. 3, Alberta Swine Breeders
- Aug. 6, Junior Farmers and the Boys and Girls Clubs
- Aug. 7, Cereal Crops, and annual meeting Canadian Seed Growers' Assn., Alberta branch.
- Aug. 8, Dominion Crop Testing Plan, farmers' load tests
- Aug. 9, Soldier Settlers
- Aug. 15, Special Day on Horticulture for the Women's Organizations.

De-Bunking Mysteries

One of the traits which keeps humanity young and adds a zest to the mere act of living, is man's capacity for wonder, his somewhat naive curiosity in freaks, and his enthusiasm for the unusual or phenomenal in nature.

It can scarcely be called a characteristic distinguishing homo sapiens from the beasts of the field or fiesdole, for the domestic cat or dog (to mention species coming within the range of everyman's experience) shows a strangely similar capacity when confronted with something strange in its immediate environment. By test of new teeth, it ascertains whether the new experience is good or bad; just as man will, by more complicated experiments it is a true, attempt to rob the mysterious of its mystery.

There is a reason, of course, for this outburst.

Strange, every aquatic monsters have been sighted in diverse corners of the globe. Reports concerning them have been considered of sufficient interest to warrant publication all over the world. A British Columbia lake provided the first thrill of the present series, a thrill which became familiar in everyone's mouth under the euphonious title "Ogopogo". The ocean, not to be outdone by a mere inland lake, immediately produced another of these strange denizens of remote waters, which, christened "Cachibrossius" to fix the credit of its habitat to Vancouver Island, quickly acquired a popular name. As "Cady" it attracted as much attention from reporters and the general public, during its brief occupancy of the spotlight, as have the Quakes quiplets of marine recent and certain origin.

France next came to bat with a claim on behalf of its particular pet, seen as through a glass darkly, but acclaimed a monster, a freak, a lusus naturae, or a throwback. The world was agog with speculation as to what manner of things these visioned creatures were.

The sea serpent of myth and anecdote never attained such repute as the new genus. The sea serpent was too easily explained. It was either a snake which had strayed from its forest lair to essay adventure on the hazy deep, or it was the garbled and twisted trunk of a fair sized squalid which ocean currents induced with similitude of life.

This was less easily explained. Its discoverers, whether in British Columbia, France, Scotland, Brazil or elsewhere—all stressed the fact "Ogopogo", "Cady" or what-have-you, was different! Scientists were interviewed by representatives of the popular press, and in unguarded moments suggested it was a relic of pre-historic times hurled across the ages, in some inexplicable way, into A.D. 1933 or 34.

It is to be regretted that Scotland should have been visited by one of these unknowns. The hard-headed Scot, on occasions such as the anniversary of Burns, may indeed be prone to vain imaginings and uncanny visions, but in his normal state, he is, essentially, "from Missouri". Loch Lomond, which has induced many poems, caught the fashion. It produced a freak seen from its "hoony banks". But when Loch Ness sought to uphold the dignity of salt-water—that was too much for the practical race north of the Tweed. It (the Loch Ness monster) was photographed—and strange, indeed, it looked! A scientist subjected the picture to piercing scrutiny—and the mystery was gone. It was, in his opinion, the photograph of the fluke of a killer-whale, too modern an animal, foresooth, to be acclaimed in competition with the million year throwbacks which imagination had created.

Until another wave of freak discoveries hit the pages of our newspapers, then, we must content ourselves with Alley Oop's dinosaur as a constant reminder of things that were before man was endowed with his amazing capacity to wonder.

To Explore Ellesmere Island

Queer Thing About Prices

Oxford University Expedition Is B.C. People Pay As Much For Leaving England In July

Edward Shackleton, son of the late Sir Ernest Shackleton, famous Antarctic explorer, is organizing what will be known as the Oxford University Ellesmere Island expedition, which is to leave England in July but it may be believed because it is a chartered Norwegian sealer. The expedition is receiving the practical support of the Canadian government and the Royal Geographical Society.

Exploration and geographical survey of some of the hitherto completely unknown interior of Ellesmere island, about 600 miles off Canada's Arctic coast, is the object of the expedition, which will be led by Dr. Noel Humphreys.

At a public dinner in London the chairman hoped that "The visitors will carry away with them some interesting souvenirs of their presence on this evening."

Diarrhoea, Dysentery, Colic
Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness, and often times the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bringing up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 88 years—you do not expect to get it.

Put up only by The T. Millburn Co., Ltd., Toronto, Ont.

Means True Progress

Streamline Train Promises Railroads
New Lease Of Life

M. E. Tracy in an article in the New York World-Telegram, says carrying eighty-five passengers to together with baggage and express 1,000 miles in thirteen hours and on 817 worth of fuel is something new. It promises the railroads a new lease of life, capital new enterprise and labor new work. Best of all, it promises the traveling public more for its money.

We have needed something of the sort for five years. With all the experimenting title has occurred to thrill people. By and large they have been forced to fall back on the hope that the best which could be done was to rearrange what they had on hand.

Progress, which should be considered as synonymous with prosperity, is not made of that kind of stuff.

We are not going to find better living conditions, much less happiness, by doing what we have always done in a different way. That is where political remedies fall.

Progress is a matter of invention and achievement.

Take this streamline train, for instance, and what does it imply?

It implies the scrapping of billions in rolling stock, the substitution of crude oil for coal, the abandonment of steam locomotives for Diesel engines, a great consumption of aluminum and a reduced consumption of steel, different operating and mechanical methods, the mobilization and training of new crews and a multitude of other drastic readjustments.

LETTER FROM A
MAN OF 90

About His Rheumatism

He asks us to excuse his writing. "I feel that I am somewhat of a nuisance on being able to write at all at his age, especially as he has been suffering from rheumatism."

This is what he says in his letter:—"Three years ago I was in bed for six weeks with inflammation of the knee. Since that time I have been taking Kruschen Salts, and have not had another attack. But my hands are somewhat stiff. I take Kruschen every morning before breakfast, and shall continue to do so, because I am sure it has kept me in good shape for three years. Excuse this writing, as I am ninety years old, and use both hands."

J. R. G. Kruschen dissolves away those needle-point crystals of uric acid which are the cause of all rheumatic troubles. It will also flush these dissolved crystals clean out of the system. Then, if you keep up "the little daily dose," excess uric acid will never form again.

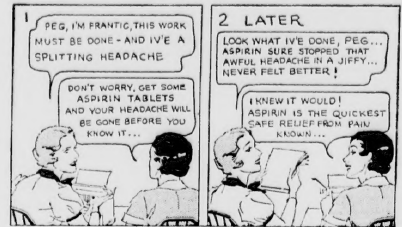

An Unusual Hobby

Englishman Has Wonderful Collection Of Match-Box Tops

A nephew of Lord Kitchener of Khartoum, Major Pat A. Beckett, of Ye Old Plough Inn, Spem, a Buckinghamshire village, owns the largest collection of match-box tops in the world. He has 22,000 different tops, and they cover every available inch of space on all the walls in three rooms at his home. He has been collecting them for many years, and has travelled almost the world over in search of new designs. He has some of the first match-boxes which came into use, and a history of world progress can be traced in the colorful designs on the match-box covers which he owns. A few years ago, ex-King Alfonso, who is also an enthusiastic match-box top collector, paid a visit to Major A. Beckett and spent several hours inspecting his display. But ex-King Alfonso's collection was limited to a mere three thousand!

All the most injurious grasshoppers in Canada shed their skins on an average of five times during the course of their development. The grasshopper's skin does not keep pace with the growth of the insect, so this pest goes through the several processes of molting by hanging upside down attached by its legs to some support and slowly wringing out of its old coat.

W. N. U. 2052

Ease Pain, Headache
in Few Minutes

For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief it is said, and disconcerted.

These results are due to a scientific discovery by which an Aspirin tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "fading hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin tablet starts to disintegrate almost instantly as you swallow it. And this is ready to work, almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

WHY ASPIRIN
WORKS SO FAST

Drop an Aspirin tablet in a glass of water. Note that B.F. (Bayer's Fast) tablet touches the water and it has started to disintegrate. What does this mean? It means that it is ready to work almost instantly.

Does Not Harm the Heart

Trying To Solve Puzzle

Scientists At Chicago Seek Reason Why Midgits Do Not Grow

Why is a midgit a midgit? Scientists and medical men who have puzzled over this baffling question for years will have an opportunity to pursue their investigation to a fuller extent at the Chicago World's Fair this summer.

Nate T. Engle, managing director of the new midgit city at the fair, has extended an invitation to scientists to use the colony of little people as a "clue" to study the perplexing problem of why the midgit never grew up.

The midgit city will occupy the same location as it did last year but will be four times as large. It will be populated by the largest gathering of midgits of both sexes and all ages ever congregated in one place.

Although a midgit's size is believed to be due chiefly to glandular disorders, no one has ever answered the question logically and scientifically.

Australian Poet Honored

Bust Placed In Poet's Corner Of Westminster Abbey

Adam Lindsay Gordon, national poet of Australia, who has been honored by his last being placed in the Poet's Corner of Westminster Abbey, is the first British Dominions poet to be so commemorated, and the first poet so honored since Tennyson, beside whom his bust stands.

A memorial volume by Mayor Douglas Shadden, on whose petition the monument has been erected, has been published giving the story of Gordon's eventful life, his one home affair, and his tragic death.

Gordon sailed to Australia "in the wild old days" and "became successively a mounted policeman, a horsebacker and trainer, a member of parliament, and the most famous steeplechase rider Australia has ever known."

He died by his own hand in 1870, burdened with debts, and depressed by the news that he had lost the case for the recovery of his ancestral lands as head of the Gordons of Hallhead in Aberdeenshire. He went out into the scrub and shot himself the day after he had published his last book of poems, "Bush Ballads and Galloping Rhymes."

The average cost of producing hay on the Dominion Experimental station in the Prairie Provinces has been \$5.50 per acre, or 6.25 per ton for a yield of 1.44 tons per acre. Considerable variation in cost has occurred on different experimental farms, the cost per acre having ranged from \$3.93 at Swift Current to \$11.10 at Morden, while the cost per ton has varied from \$4.47 at Brandon to \$5.82 at Indian Head.

X-Ray Motion Pictures

Newly Perfected Camera Shows Bones In Process Of knitting

Broken bones are now shown in the process of knitting by x-ray motion pictures which are made by a new camera perfected by Doctor Arthur C. Pillsbury, naturalist and photographer of the University of California. Doctor Pillsbury's camera works on the same principle as the one used to photograph the unfolding of flowers, taking a series of single pictures at intervals, of a movement imperceptible to the human eye, and then running them off as motion pictures to show movements which may have taken several days, all encompassed in a few moments. The first motion picture made with the x-ray camera showed the growth in the interior of a rose. It took seventy-two hours to film, as only one picture at a time could be made in intermittent exposures. To avoid damaging the rose during the filming Doctor W. D. Coolidge, inventor of the Coolidge tube, designed a special x-ray tube.

British Museum Buys Records

Bible Contains Birth Of First Children At Tristan Da Cunha

Bible records of the births of the first children at Tristan da Cunha, the lonely little British island of volcanic origin in the south Atlantic, 2,000 miles west of the Cape of Good Hope, have just been purchased by the trustees of the British Museum. This Bible, which is an American one, dated 1851, was in the family of William Glass, the English founder of the Tristan settlement. In now faded ink it records Glass' marriage and the birth of 16 children, from whom many of the Tristan islanders today are descended. The latest owner was Mrs. Annie Glass, a granddaughter of William Glass.

"I don't know what to make of the letters in my garden," says a correspondent. He had better consult a salad recipe book.

Hang it in your kitchen. Pull out one sheet of Waxed Paper at a time.

Appleford PAPER PRODUCTS
HAMILTON, ONTARIO

Research Laboratories Investigate Possibilities Of Using Wheat For Manufacture Of Fuel Oil

Seeking new uses for Canada's new over-abundant supply of wheat, scientists are investigating the possibility of using 25,000,000 bushels of wheat every year to drive motor cars. After further study of the possibility of using alcohol made from grain as a motor fuel the national research laboratories have issued a revised report bringing the information available up to date.

If one-tenth of the annual consumption of motor fuel in Canada were replaced by alcohol made from wheat, the report estimates, some 25,000,000 bushels would be needed. A survey shows the use of motor fuels is increasing in Europe and is being seriously considered in the United States.

In a discussion of this possibility the report estimates it would increase the cost of motor fuel by approximately two or three cents a gallon, assuming the use of No. 5 wheat at 60 cents per bushel, Ford William basis.

Engine tests carried out in the national research laboratories with mixtures containing 5, 10 and 15 per cent. alcohol show that alcohol is an excellent anti-knock agent. The 15 per cent. blend gave somewhat more power than gasoline alone, but fuel consumption is higher. It is suggested the use of alcohol might render unnecessary the importation and use of tetra-ethyl lead as an anti-knock compound.

In the near future motor fuel made by the hydrogenation of coal may also be a competitor in the motor fuel market, the report notes. This will be finally demonstrated in the course of a year or two as a result of a plant being built in England under a subsidy arrangement with the British government.

To Preserve Order

May Pass Legislation In England To Empower Police To Enter Political Meetings

Legislation empowering the police to enter political meetings when their presence is warranted in the interests of peace and order will be likely effected at once in the British House of Commons. It is planned to have it ready for application to a scheduled Fascist rally at the White City stadium in August.

The government's decision to tighten the present law, which limits police attendance at political meetings unless they are invited or disorders are anticipated, followed a debate in the commons in which Sir John Gilmour, home secretary, intimated the government might have to arm itself with further powers to prevent disorders.

Leaders of all parties in the house will be consulted on the new legislation, it was said. Recent clashes between Fascists and Communists were referred to during the debate.

Offers Good Market

China Imported \$600,000 Of Chewing Gum Last Year

Last year China imported \$600,000 worth of chewing gum. This amount is estimated to total about 70,000,000 strips. The traditional Chinese equivalent of gum is the water-melon seed, of which tons and tons are consumed each year throughout the width and breadth of this vast land. Few Chinese pass a day without cracking a few black dried seeds between their teeth and it is estimated that every Chinese disposes of at least ten seeds a day. If an arbitrary population of 400,000,000 is accepted it will be seen that gum has a long way to go.

Beating The Law

How the law is beaten is told by a Kansas paper: "A travelling man was called the attention of a western Kansas hotel man that it was against the law to use roller towels. 'I know it,' said the landlord, 'but that towel was up before the law was passed and the law is not retroactive. The law has been in the books over 20 years.'

W. N. U. 2652

Wheat Is Wealth

No Surplus Of This Commodity Says Henry Ford

There is no wheat surplus in the world today, Henry Ford said in an interview with the Financial Post. "The world could use many times as much wheat as it grows today," he said.

"Wheat is wealth," he continued. "The wheat surplus is a direct challenge to learn more ways in which to use wheat. The trouble is everybody thinks of wheat in terms of money. They raise wheat in order to buy money with it. That is putting the cart before the horse. The wheat is wealth; the money is merely part of the conveyor system which passes the wheat around."

The automobile magnate said there may be a score of uses for wheat waiting for someone to discover. "Yet with all the magic of an unrivaled future in every kernel of wheat we tell farmers that they must grow less of it and we try to raise the price so that people cannot afford to buy it," he declared.

"There never was a crazier notion than the idea that there can be too much of anything," he continued. "There is need right now in the world for all we can produce of every useful commodity."

Canada's Dairy Cattle

Number Is Steadily Increasing States Federal Official

Hector Cutten of the dairy branch of the federal department of agriculture, told a service club at Kentville, Nova Scotia, the number of dairy cattle in Canada is steadily increasing despite Henry Ford's prediction that before long a milk diver will replace dairy cows and synthetic milk will be in general use.

People in Canada are using more condensed milk than ever before, he said, noting that the first condensed milk factory in Canada was built in Truro, N.S.

He continued that Canada, in her best years, produced \$250,000,000 worth of dairy products.

A Scientific Feat

Rejuvenation Process For Seeds That Makes For More Rapid Growth

A scientific feat that is almost the equivalent of abolishing winter is a new kind of rejuvenation process for seeds that promises to be of immediate benefit to the farmer, has been accomplished by the United States department of agriculture.

It has found that the longer wavelengths of light, the red, orange and yellow rays, have the almost miraculous power of rousing seeds from their winter dormant state, a sort of living death, and start them growing several months ahead of schedule. This new process of "seeds resurrection" was discovered and developed by Dr. L. H. Flint.

Justice seldom exceeds the speed limit.

Water Shortage In London

City Has Only About Three Months' Supply In Storage

London tube trains and buses are plastered with notices urging economy in the use of water, as no prospect is seen of any material rainfall.

Some anxiety exists in several small centres where, if the dry weather continues, assistance may be sought from other municipalities.

London itself has about three months' supply in storage.

Tomatoes grow reddest if not exposed to the hottest sun.

May Undertake Study Of Barley With Object Of Improving Quality And Finding Markets

Problem In Nature

How Birds Know Their Especial Points Of Beauty

A mysterious problem is presented by the way birds display to best advantage their special points of beauty, for, lacking mirrors, how should they know where their beauty lies? where are the touches of color, out of sight of their eyes, which are crowning glories? How should a goldfinch know the decorative value of the blades of crimson on his face? Yet he will force the glory of his blaze on the attention of the hen he is courting, turning his head this way and that, as if to hypnotize her by its brilliance. And it is very sure that he makes the most of the gold bars of his wings, as the goldfinch does of his white epaulettes. The goldfinch dances to display those bars, and the way he stretches his wings, fanwise, with the air of a tailor unrolling a cloth of gold, has earned him the name, "proud tailor." A hundred examples of beauty of which birds seem conscious, though it may be invisible to their own eyes, will crowd to mind. A minor one is presented by that lover of trees, the nuthatch, who will turn himself into a green and colored image of a bird as he poses on a tree-trunk before a hen, as if to give her the best possible view of his watch-like and buff tones. To display the buff on his breast he parades before her with stately steps and head pushed forward.

Alberta's Fire Toll

More Casualties Last Year But Less Property Loss

Thirty deaths from fires were the casualty list for Alberta in 1933, according to the report of Fire Commissioner Henry Bruce, as made to Hon. R. G. Reid, provincial treasurer, for the calendar year. The number of deaths is considerably in excess of the figure for the preceding year, which was but nine.

There were 1,825 fires during the year, in all parts of the province, and property loss aggregated \$1,435,612 as compared with \$2,485,491 from 1,937 fires in 1932. A reduction in losses for the second year in succession amounting to more than a million dollars, is regarded as a highly satisfactory feature of the fire situation. It was, moreover, the lowest fire loss on record for the past 14 years.

While the number of fires was only slightly less than the year before, the report points out that "the fires that did occur did not assume the proportions or cause the destruction that was the case in former years."

Eight out of every 10 fires are declared to have been due to carelessness in the handling of fire or neglect in removing fire hazards.

The only notable increase in Sunday school attendance in the world in recent years has been in Africa.

Establishment in Canada of a barley research laboratory and if necessary the importation from Europe of a biochemist with special knowledge of malting problems to direct it, was recommended by the grain research committee at its meeting in Ottawa.

C. M. Hamilton, member of the board of grain commissioners, Winnipeg; L. D. Wilgess, director of the commercial intelligence service, department of trade and commerce, Ottawa, and C. B. Davidson, of the agricultural branch, Dominion bureau of statistics, sat in at the meeting. Representatives of the University of Alberta, the University of Saskatchewan, the federal department of agriculture and the National Research Council and laboratories attended as members of the committee.

On the basis of quality, it was agreed, Canadian barley would find markets and it was with scientific research that the required quality would be obtained.

The suggestion was made that Canada should proceed with fundamental studies of barley as she had undertaken fundamental studies of wheat.

It was decided to prepare memoranda for the appropriate authorities on the discussions which had taken place at the meeting on the following: Ways and means of facilitating the distribution of feed grains in the domestic market; ways and means of increasing the cleanliness of course grains and the desirability of raising the statutory coarse grain standards; ways and means of assuring that sufficient seed of good quality is available in growing areas.

Farm Crops Production Costs

Keeping Cost Records Has Become Necessary For The Intelligent Farmer

Data on the cost of production, accurately kept for several years and then properly interpreted, make possible a more intelligent selection of crops and throw some light on a better proportion of each crop to grow. Every farmer has his own method, as is evidenced by the story of the farmer whose barn was on fire. His neighbors were helping him, first getting out the stock, and then the implements. Then one of the helpers saw the farmer vainly attempting to wrench off the barn door and asked "What in the world do you want with that old door?" The farmer replied "Well, this door has all my figures on it for the last five years, and I have got to save it." Of other methods used in estimating the cost of producing crops, much valuable information on every phase of cost may be found in the latest bulletins on the subject, No. 129 Prairie Provinces; No. 108 Eastern Canada) issued by the Dominion Department of Agriculture.

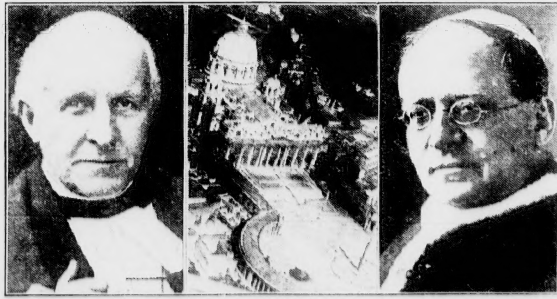

All Have One Defect

Plans To Make Over Society Forget About Human Nature

Elmer Root, one of the foremost American jurists and statesmen of this generation, once said: "All my life people have been coming to see me with plans to make over society and its institutions. Many of these plans have seemed to be good. Some have been excellent. All of them had one fatal defect. They have assumed that human nature would behave in a certain way. If it would behave in that way those plans would work but if human nature would behave in that way those plans would not be necessary, for in that case society and its institutions would reform themselves." Toronto Mail and Empire.

Everybody Tries It

The human desire to get something for nothing apparently knows no class distinction. Police headquarters revealed the occupants of 28 persons arrested in raids on local bookmakers included eight day laborers, a "gentleman farmer", a journalist, a milkman, six traveling salesmen, a shoemaker and a negro pastor.

ARCHBISHOP OF CANTERBURY ASKS POPE HELP AVERT WAR

In a startling plea to His Holiness Pope Pius XI. to help avert war, the Most Reverend Cosmo Gordon Lang, Archbishop of Canterbury, stressed the peril surrounding world peace. In a speech before a gathering in London, the Archbishop asked the spiritual head of the Roman Catholics to call upon all his churches throughout the world to promote a better spirit of Christianity. In the photos are, left to right: The Archbishop of Canterbury; St. Peter's Cathedral in the Vatican City, and Pope Pius.

Sport Briefs.

Didsbury and Hainstock tonight
meet in their second game of the
playoff series to decide who enters
the finals for the Rosebush League
championship. Didsbury eliminated
Hettichon, while Hainstock put their
fall out of the running. Bowden
and Oiks have played one game,
and the winner of that series will
meet the winner of the Didsbury-
Hainstock series for the championship.
Didsbury lost to Hainstock
Tuesday, but it isn't all out and
dried yet, as in that game they were
without the services of George and
Charlie Geiger. Don't be surprised
if our local ball tossers put over a
win tonight.

Disarmaments, peace pacts, truck
agreements—all have been shot into
the background in England during
the past month. World events have
been forgotten in the excitement of
the smashing victories scored by
Britain in the realm of sport. After
a lapse of 20 years England has
again come into her own and is
enjoying leadership in the world of
sport. The victory of Fred Perry,
brilliant tennis star, took the cov-
eted Wimbledon title back to Eng-
land for the first time since 1909. And
when Dorothy Round of England
won the women's championship—
England just about went wild.

HERE and THERE

S. S. Empress of Japan arrived
at Victoria recently with one of
the latest passenger liners in the
past three years. There was a
total of 577 from the Orient and
Hawaii. The liner was also
heavily loaded for the westbound
trip from Vancouver and Victo-
ria.

Speaking at Toronto recently
before members of the Inter-
national Building Owners and
Managers Association, E. W.
Beatty, K.C., chairman and presi-
dent of the Canadian Pacific
Railway, doubted the wisdom of
"too elaborate planning" in na-
tional economics. Mr. Beatty did
not think the present system of
society was wrong, except in the
"way in which it is applied."

The Canadian Pacific Railway
will celebrate the fifthth anni-
versary of the completion of its
transcontinental line next year.
It was November 7, 1925 that
Donald A. Smith, later Lord
Strathcona, drove the last spike
at Craigellachie joining east to
west and Atlantic to Pacific.

Hon. Charles A. Dunning, vice-
president and general manager
of the Seaboard Club, Monte-
bello, Quebec, has been elected a
director of Barclay's Bank, Can-
ada. The former Federal Min-
ister of Finance is also president
of the Ontario Equitable Life In-
surance Company.

After one of the most remark-
able and successful meetings ever
held by a religious body, the Ox-
ford Group left the Danff Springs
Hotel for the East. Many of
them sailed from Quebec by S. S.
Empress of Australia for Eng-
land. The next home party will
be held at Oxford July 1-14.

Speaking at the Admiral Beatty
Hotel, Saint John, Sir William
Clark, British High Commissioner
to Canada, claimed that the real
source of Canada's troubles in
connection with marketing agri-
cultural products lay in the un-
economic expansion of agricul-
tural production by industrial
countries, especially some of the
larger European countries which
are normally importers.

Music, moonlight, glorious lake
breezes with 400 miles of sailing
on the Canadian Pacific's Great
Lakes ships Assiniboine, Keweenaw
and Manitoba are at the dis-
posal of passengers on the com-
pany's lines this summer at low
cost. The offer promises to be
very alluring to Canadians and
visitors to the Dominion as well.

Quebec Province is alive with
festive celebrations and gala
events this year marking the
anniversaries of some of the
most memorable events in its
history. Among them and the
most important is the 40th an-
niversary of the discovery of Can-
ada by Jacques Cartier in July
1534.

Best Time to Prune Hedges.

Hedges are made of different kinds of plants, some of which are deciduous, that is, they drop their leaves every fall, while others are evergreen.

At the Central Experimental Farm, Ottawa, about 130 different varieties of trees and shrubs have been tried, and there are now about 60 different hedges growing side by side, some of which were planted in 1889, according to Isabella Preston, of the Farm.

The deciduous hedges are generally trimmed about the end of June, or when the season's growth is almost completed. This gives them time to make enough new growth to cover the wounds left by the clipping. The evergreen hedges are trimmed a little later, as their growth is slower.

Sometimes a few odd branches may grow large and spoil the neat appearance of the hedge after the trimming. If this occurs the branches are cut off.

The trimming should be done annually, as it is difficult, if not impossible, to remake a hedge which has lost its shape. It is better to clip the hedge at the wrong season rather than not clip it at all.

The shaping of a hedge is very important, and it has been found at the Central Experimental Farm that it is better to have it widest at the base. It can be tapered to the top, or it can be rounded or flat. In districts where there is much snow a tapered top is much the best, as the snow will slide off instead of settling into the hedge and spreading and breaking the branches, thereby spoiling the shape. If the hedge has rounded sides and so is wider above the base, there is danger that the lowest part will grow bare and ugly.

Takes Over New Duties

After 10 years in dairying, 32 of which were spent in this province, Dr. C. P. Marker, dairy commissioner, retired last week, to be succeeded by J. Roy Sweeney, native of New Brunswick, and for some years chief federal grader at Winnipeg.

Here and There

The British Columbia Chapter of the I. O. O. F. held its "coming of age" meeting at the Empress Hotel, Victoria, recently, at the twenty-first annual convention. Premier Pattullo welcomed delegates from all over the province, and many distinguished guests were present.

The annual reduction in cost of summer railway travel under the heading of low summer fares, will be put into effect by the Canadian Pacific Railway on May 15th next, according to official announcement. The reduced fares will have extensive limits and stopovers.

Port Hope, on the south bank of the Fraser River, ninety miles from Vancouver by the Canadian Pacific, is a place where the Almighty has most lavishly set down in a land of wonderful beauty rivers and lakes abounding in game fish, writes B. Stone Kennedy, editor of Western Fisheries.

Dr. Frank N. D. Buchanan, leader of the Oxford Group movement, is expected to launch another campaign in western Canada this spring, commencing at Winnipeg May 1, taking in Regina, Saskatoon, Calgary, Edmonton, Vancouver and Victoria, and culminating with a selective "no sex" party at the Banff Springs Hotel early in June.

The success of low cost all-expense tours in the Canadian Rockies instituted by Canadian Pacific since last summer has prompted the company to repeat these four, five and six-day trips during the coming summer. Each trip affords 124 miles of motor-ing, and can be made either east-bound from Field, B.C., or west-bound from Banff, Alberta, at the convenience of passengers.

A. C. Leighton, R.B.A., president of the government art college at Calgary, who will again this summer hold his summer art school for selected students from the Province of Alberta at the Kananaskis Dids Ranch, near Banff, has picked a location surrounded by the most magnificent Rocky Mountain scenery.

Elkton Notes.

Neighbors and friends gathered at the home of Mr. and Mrs. S. M. Campbell last Monday to celebrate the 19th anniversary of their wedding. A picnic lunch was served by the ladies. Mr. and Mrs. Campbell were presented with a glass fruit bowl and eight nappies. A very enjoyable afternoon was spent.

The Elkton seniors journeyed to Bergen Sunday afternoon for a softball game. They returned home on the short end of a 10-9 score.

Important Seed Grain Field Days

Three important seed grain field days will be held in the province during August, on at Vermilion, August 2; Claresholm, August 3, and at Oids on August 10. These are held under the auspices of the provincial department of agriculture and dominion seed branch, co-operating with the Alberta wheat, pool, the Canada Milling Co., the U.G.G. and the Western Canada Flour Mills. Samples of grain from seed drills of farmers in various districts were collected this spring, and these samples have been grown in plots at the schools of agriculture and will be inspected on the field days, thus giving an opportunity for all concerned to note the kind and quality of seed.

Make Homesteaders Preserve Trees

Consideration is being given by the provincial government to enactment of regulations compelling homesteaders to retain on their land a portion of the natural timber, according to Premier R. G. Reid. This work will be in line with the general reforestation policies adopted by the premier when he took over the then newly-formed lands and mines department in 1930.

"SEA CHANGE"

Captain R. G. Latta (left) and Captain R. N. Stuart. Centre photo shows a portion of the huge crowd that assembled at Wolfe's Cove, Quebec, Saturday, June 30, to wave farewell to the popular "Jock" Latta.

A famous Atlantic skipper severed his connection with the sea at the completion of voyage 44 of the Canadian Pacific flag-ship, Empress of Britain.

Captain Robert Gilmour Latta, first Commodore of Canada's big passenger fleet, first commander of the Empire's latest luxury liner, and friend of Princes, Prime Ministers, and thousands of other travellers from all parts of the world, has been retired under the pension plan of the Canadian Pacific after 30 years in passenger service between Canada and the Old Country.

E. W. Healy K.C., President of the Canadian Pacific, said in announcing his retirement: "If departure from the sea will be a loss that is balanced only by the gain which will accrue to the liner in which he takes up his residence. While it is with his friends in the company, any farewell to Commodore Latta, and that his close association with us comes to an end, all I am sure, join with me in felicitating him upon being still young enough to anticipate

many years of useful service to his community."

At the age of 62 Commodore Latta completed 28 years as a seaman. He started as an apprentice in the sailing ship "Albatross" in 1896, and joined the Canadian service eight years later as a Fourth Officer. He was appointed to command in 1925, and became the first Captain of the 42,600-ton Empress of Britain for her maiden voyage in May, 1927, from which date the big liner has not known the hand of any other commander in the course of travelling 250,000 miles.

V. C. Captain Broadbent, co-incidental with the announcement of Captain Latta's retirement was the appointment of Captain R. N. Stuart, V.C., D.S.O., D.C.M., R.D., R.N.R., as the second Commander of the big white liner, and the second Commodore of the "Canada" line. Captain Stuart also commenced his association with the sea in a sailing ship, and his appointment at the age of 47 as the youngest Commodore in the Merchant Service culminates 32 years of sea

service which included four and a half years in the navy during the war.

His war service is well known, and as a commander of "Mystery Ships" and Destroyers he was awarded the Victoria Cross, Distinguished Service Order and the Navy Cross of the United States, or him Mr. Healy said, "Captain Stuart's record for his Country is one of the outstanding war stories of the sea, and his record with the Company is equally brilliant."

Command of the Empress of Britain took her speed and almost continuous service, calls for men of very high calibre, and it was in appointing Captain Stuart to the Empress of Britain, and naming him the second Commodore of the Canadian Pacific line, we have chosen a worthy successor to Captain Latta."

The transfer of command took place at Southampton, July 7, when Captain Stuart took over his new command, and the genial "Jock" Latta swallowed the anchor.

by LOU SKUCE

OGDEN'S CUT PLUG

WORLD HAPPENINGS BRIEFLY TOLD

Fifty additional constables have been engaged on the Northern Ireland border to cope with cattle smuggling from the Irish Free State.

The Prince of Wales has accepted the presidency of the English-Speaking Union of the British Empire, it was announced in London.

Twelve new warships are to be built for the Polish navy. It was reported at Warsaw. They will be four mine sweepers, two destroyers and six submarines.

What is probably the world's largest modern lathe has just been made at Sheffield for the English Steel Company to admit forgings up to 60 feet in length and 80 inches in diameter.

Once again, the fact that Britain has no intention of handing over Bermuda or any other territory in payment of the war debt to the United States was stated in parliament.

A court-martial found Augustine Wahlmaras, former premier of Lithuania, guilty of an attempt to overthrow the existing government, June 7. It condemned him to 12 years at hard labor.

Without fuss or ceremony, the bridge across the second narrows of the Burrard inlet, connecting Vancouver with the north shore, was re-opened for traffic after being closed nearly four years.

The birth rate in England and Wales was higher during the first four months of this year than in the same period last year, according to vital statistics made public recently. An increase of 906 births was recorded.

Report of silver bullion in May more than doubled that of the corresponding month last year, while a substantial increase was shown in the value of gold bullion exported, the Dominion bureau of statistics says in a report.

Establish Farm Schools

Prince of Wales Donates Sum For Child Emigration's Society Plan

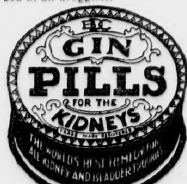

The Prince of Wales has donated \$5,000 to the Child Emigration Society's scheme for establishment of farm schools in the Dominion for children from Great Britain, including a farm school in British Columbia.

With the support of the prince the society launched a campaign for \$50,000 to develop the scheme, which has proved very successful in Western Australia. Children remain at the farm schools five or six years.

Employment in Belgium is now above last year's figures.

Sure Signs

of kidney troubles are pain in the back, difficult urination, deposits in urine. GIN PILLS relieve kidney trouble by gently soothing and healing the inflamed tissues. Ask a look at all druggists.

Four Trips Each Year

Air Mail Service For Fond du Lac Post Office

Between 8,000 and 10,000 letters from air mail collectors were carried on the inaugural flight June 15 between Fort Chipewyan and Fond du Lac at the eastern end of Lake Athabasca, according to postal officials at Edmonton.

Information from Ottawa shows that the Canadian Airways, Ltd., which has the mail contract, will make four trips a year between the two offices.

Little Journeys In Science

ANAESTHETICS

(By Gordon H. Guest, M.A.)

Acclaimed as "God's greatest mercy brought by man to man," ether was first used in surgical operations nearly 88 years ago. The first demonstration took place in the Massachusetts General Hospital at Boston on October 16, 1846, when William T. G. Morton, a young Boston dentist demonstrated that this anesthetic could be used successfully in the performing of operations. Although Dr. Morton is credited with giving the first demonstration of the use of this anesthetic before a group of medical men it is understood that a Dr. C. W. Long of Jefferson, Georgia, had previously used it to some extent in his practice. Following Dr. Morton's demonstration, the use of ether was quickly adopted by medical men on this continent and abroad. This new development brought about a great revolution in surgery and did away with the gruesome scenes which had formerly been associated with operations during which the patient did not lose consciousness.

In 1844 Humphry Davy, the English scientist known throughout the world for his invention of the Deth Safety Lamp, used by miners, did some work with nitrous oxide, better known as laughing gas. This gas proved to be a satisfactory general anesthetic and is widely used for this purpose.

With the discovery of ether and laughing gas scientists became interested in this new field and it was not long before chloroform was produced. Dr. James G. Simpson and Thomas Nunally being outstanding in this work.

Kidney is another anesthetic which was introduced in later years, and which was found to have many advantages for surgical work. Acetylene is also used as an anesthetic, but is not as common as the others.

In addition to the value of anesthetics in relieving suffering during operations, they have benefited humanity greatly by making it possible for scientists to study various diseases and to find cures for them. Animals, studied under the influence of anesthetics have been the objects of many researches which have brought about great benefits to the race.

Care Of Rubber Belting

Vegetable Castor Oil Will Keep It In Good Condition

A cheap and effective method of keeping a rubber belt in condition and to prevent shraping is to apply 20 to 30 drops of vegetable castor oil once a week on a small rubber belt, or about one-fourth to one-half ounce on a main drive belt. Mineral oil of any kind should never be used on rubber belts. Most commercial belt dressings are not suitable for rubber belting and should not be used except on the advice of the belting manufacturer. Rubber belts should be left on the pulleys, day and night, rain or shine.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile - Without Calomel

Your liver is a very small organ, but it is really the most important and valuable organ in your body. It is the organ that filters out of your blood all the waste and poisons that are in it. It is the organ that keeps your blood clean and healthy. If your liver is not working properly, your blood will be impure and your health will suffer. You will feel tired and weak, and you will have a yellowish tint to your skin. You will also have a bitter taste in your mouth and a bad odor to your breath. All these are signs that your liver is not working properly. You need a liver stimulant. Carter's Little Liver Pills will soon bring back the normal color to your face. They are purely vegetable and make sure. Ask for them by name. Little Liver Pills. Don't let it slip away.

New Super-Cunarder

Surprising Details Of Vessel Now Being Built In Clydebank Shipyard

The enormous size of the funnels to be placed on the new super-Cunarder, now designated as the 554 in the Clydebank shipyard, Glasgow, may be visualized when compared with the various tubes and tunnels in operation in New York City. The giant liner's stacks will be in the neighborhood of 100 feet in circumference. The diameter will be approximately 20 feet. Thus it will be greater than any of the following: Holland Tube, 20 feet 6 inches; Pennsylvania R.R. Tubes, 23 feet; East River Tubes, 23 feet; New York Central Tunnel, 15 feet, 9 inches; 60th Street Tunnel, 18 feet.

The forward funnel will be more than 70 feet in height from the boat deck, the two other funnels decreasing in height. From the keel to the top of the forward funnel will be approximately 180 feet, equivalent in height to a building of 15 stories. The final design of the funnels was reached after many demonstrations in a specially constructed wind tunnel. More than 39 model funnels were tested.

A highly important job is taking place in the shipyard in connection with the fitting of the immense rudder. Constructed at Darnley, this rudder weighs nearly 140 tons and is by far the largest ever made. It is at present in the shipyard at Clydebank where expert workmen are engaged in assembling the various component parts. When this job is completed and tests carried out to ensure that every detail in the fitting is perfect, the rudder will be dismantled and transported in sections to the liner's berth where it will be re-assembled and fitted on to the ship.

Other tests which have been carried out include those to determine the design and form of the liner, in the form of sixteen models were used and over four thousand experimental runs carried out in the experimental tank. The wind tunnel experiment in which models of 30 funnels were used, to decide the design and shape of the great funnels and to make sure that the decks and ventilators of the ship will be kept clear of wind gusts and the experiment made to ascertain the exact position on the bows of the hawsepoles. For the latter purpose shipwrights erected in the shipyard a wooden replica of the immense bow of Number 534 and with a model of the hawsepoles and another model of the anchors a series of tests were made, perfection in action being finally achieved.

In the series of cabins being constructed ashore for testing purposes, everything that goes into a stateroom in all three classes of accommodation will be given a critical try-out. The rooms will be exact replicas of similar rooms which it is intended to build into the ship. The designers and furnishing experts will fit out the model rooms down to the last detail. Numerous designs in wall decorations, curtains, carpets, and other hangings will be tried out; furniture, beds, wardrobes, easy chairs, etc. will be installed until the experts are satisfied that the decorative and furnishing schemes provide the maximum of comfort and restfulness.

An important feature will be the demonstration carried out in regard to the heating, lighting and ventilation of the rooms. Scores of these experiments will be made to make certain that the perfect ease and comfort of the passengers will be assured.

These model cabin experiments are another remarkable instance of the meticulous care and attention which is being paid to the construction of this great ship.

Is Really Resting

The woman who dances on spindly high-heeled shoes is really resting, the West Virginia Osteopathic Society was told. "When a woman puts on high-heeled slippers and goes out to dance she is giving her feet a beneficial treat," said Dr. H. E. Clybourne, of Columbus, O. "The change to high-heeled slippers changes the muscular pull of the muscles and gives the feet a rest."

Government Annuities

Report Shows The Government Makes A Profit On This Fund

The Dominion government in the fiscal year 1923-24 received \$7,672,000 in annuities payments and paid out \$2,500,000 to beneficiaries, the senate special committee on public accounts was told by E. G. Blackadar, superintendent of annuities, department of labor.

The total amount received since 1908—the 26 years government annuities have been in effect—was \$43,413,000. Payments in the same period totalled \$13,565,000. The annuities fund has a credit of \$35,000,000 with the finance department, Mr. Blackadar informed the committee.

Annuities are sold by the government particularly with a view to assisting the person with small incomes to save.

There was a profit to the government on the annuities fund, Mr. Blackadar stated. The average interest charge allowed the fund was 4.42 per cent.

The average interest charge on government obligations outstanding last year was 4.62 per cent. The government, however, absorbs administration costs of the fund.

"Then the fund more than pays its way?" Senator W. A. Griesbach (Edmonton) asked. "It was widely believed the annuities fund was a burden on the country."

Drills Pin Two Ways

Watchmaker In Woodstock Goes

Measur Jeweler On Better

Reading of the feat of a Meadford, Ontario, jeweler who after twenty-five years of endeavor had succeeded in drilling an ordinary pin end to end, Fred Wilkins, a Woodstock watchmaker, felt called on to accept the challenge. Within three-quarters of an hour he had drilled the pin through, end to end, then cross-drilled it near the point, and gold-plated it. Claiming the feat as a feat of patience rather than of skill, Mr. Wilkins stated that he had accomplished it once before in competition in Toronto a number of years ago, but at that time had "blistered" the side of the pin at one point, while the present job was a perfect one.

When you hear a grasshopper chirp, you can be sure it is warmer than sixty-two degrees Fahrenheit. The insect is silent at cooler temperatures.

DENICOTEA Cigarette Holder absorbs the nicotine, pyridine, ammonia and resinous and tarry substances found in tobacco smoke.

Complete holder with refills — \$1.00 postpaid, or from your Druggist or Tobacconist. Dealers wanted everywhere.

DIDSBURY

BIRTHS

At Didsbury General Hospital.

Sunday July 22: To Mr. and
Mrs. George Hardy, a daughter.

Westerdale Notes

Mr. John Babke was a business
visitor to Calgary last Saturday
returning Sunday with his wife and
daughter, Blanch. Mrs. Babke has
been confined in a Calgary hospital
for the past few months.

Mr. Ben Kershaw is remodelling
his home this week. He is raising
the roof and making a number of
improvements. Mr. and Mrs. Ker-
shaw are occupying the Westerdale
parsonage until their house is com-
pleted.

Westerdale Municipality No. 311

Re. Tax Consolidation

TAX NOTICE: Applications
must be made prior to August 1st,
1934, in order to take advantage of
the Local Tax Arrears Consolidation
Act whereby an extension of time
for payment of arrears of taxes and
certain discounts will be allowed to
applicants signing the necessary
forms obtainable at the Municipal
Office.

The following are the discounts:
If in arrears 6 yrs or more 20% discount
5 " " 22% "
4 " " 18% "
3 " " 14% "
2 " " 9% "

Hail Insurance Taxes excepted.
Tax Consolidation would spread
the payment of arrears over 6 years,
if at the same time the current taxes
are paid each year as they become
due.

Taxpayers in arrears who do not
take advantage of the Tax Consoli-
dation Act may expect Tax Sale
Proceedings to be carried out.
—A. M. Naughton, Sec.-Treas.

Melvin Notes

Wedding bells are ringing.
Mrs. Greig is attending the fun
women's week at Olds.

he has put in a complete stock of
Chateau patterns. Price 15c each.

Mr. and Mrs. Carl Brightman
and family are holidaying at Sylvan
Lake.

Miss Laura Smith returned Sun-
day from an enjoyable holiday
spent at Ponoka.

Mr. and Mrs. Percy Lunt were
Calgary visitors last weekend at the
home of Mrs. Lunt's parents.

Mrs. B. T. Parker and sons have
returned from a two weeks visit
with friends and relatives at Ed-
monton.

Messrs. Tom Rorda, Pete Booker,
Fred Evans and Bob Gulliver are
spending a camping holiday out
west.

Mr. A. M. Anderson will make
his next visit to Didsbury Wednes-
day August 1st, 1934.

Mr. and Mrs. T. DeWitt and
family are spending their vacation
with friends at Vulcan.

Postmaster Morgan left Monday
morning for Brandon, Man. where
he will attend the convention of the
Manitoba postmasters.

Mr. and Mrs. C. H. Adshend and
family left Sunday for Radium
where they will spend their vaca-
tion.

Mr. Dave Edwards who has been
bail adjusting in the north for the
past month is back home and states
that crops in many parts of the
north are in a very poor condition.

A number of citizens were at the
Hunter Valley oilwells on Sunday.
They report that wet gas has been
struck and that prospects for dry
gas are good.

Mr. and Mrs. George T. Earle of
Elkhorn, Manitoba and Mr. and
Mrs. H. J. Oldaker of Calgary have
been recent guests of Mr. and Mrs.
F. W. Leeson.

Mr. Tom Wyman, who has been
confined to his bed for the past week
with blood poisoning is around
again but compelled to use crutches.
His many friends wish him a
speedy recovery.

Mr. and Mrs. Fred Snyder an-
nounce the marriage of their
daughter Annie to Mr. Reinhold
Refus, Tuesday, July 31, 1934 at
12 o'clock noon at the Baptist
Church, Westcott, Alberta.

visiting his brother, Mr. Bert
Brooker here. Mr. Eugene Brooker
is enroute for Red Deer where he
will attend the oldtimers convention
at Red Deer's jubilee celebration.

Don't forget the sports day and
dance under the auspices of the
Didsbury Boys Band on Wednesday
August 8. This promises real
entertainment. Bring the kiddies
and let them enjoy a happy day
with the band.

The last card received from Mr.
Gooder prior to embarking for Eng-
land, stated that he and Mrs.
Gooder had enjoyed a very pleasant
trip across Canada. Alberta crops
were easily the best seen on the
trip, Mr. Gooder said.

Word was received by Mrs. M. B.
Clement of the death of her sister
Mrs. George Witter of Burnham,
Ont. who died at the age of 69
years following an illness caused by
double pneumonia. Mrs. Witter
was well known to many of the old
timers of this district.
